

DEMOLITION, LAND CLEARING, AND CONSTRUCTION WASTE

START SORTING DLC WASTE NOW TO AVOID HIGHER FEES IN 2021!

Demolition, land clearing, and construction waste (DLC) doesn't need to end up in a landfill. Local recyclers can reuse it.

HERE ARE A FEW TIPS ON STARTING TO SOURCE SEPARATE DLC WASTE.

1 Draw up a plan to consider what can be deconstructed for valuable parts instead of demolishing the whole building.

2 Make sure there is enough time in the demolition plan to source separate the demolished materials.

3 Have space at the demolition site for piling or placing bins for each type of waste.

Recyclers accept some materials, like wood, concrete, and asphalt, and can save you money on disposal, compared to taking them to the landfill site. See our website sortsmart.ca for more information on local options.

WHAT IS CONSIDERED DLC WASTE?

- asphalt
- asphalt shingles
- clean wood
- concrete
- drywall
- masonry and rubble
- painted and treated wood
- scrap metal
- stumps and large branches

RECYCLING

Put waste in its proper place!

REGIONAL DISTRICT
of Fraser-Fort George

WHAT FEES WILL BE CHARGED?

Starting early 2021, a 50% surcharge on the applicable tipping fees will be levied on asphalt, concrete, masonry and rubble, and any mixed DLC loads.

In 2022 a 100% surcharge will apply, doubling the cost of the landfill fees for some DLC waste.

REDUCING STARTING EARLY 2021

RDFFG WILL BE REDUCING TIPPING FEES FOR:

CLEAN WOOD WASTE

PAINTED AND TREATED WOOD WASTE

SCRAP METAL

STUMPS AND LARGE BRANCHES

INCREASING STARTING EARLY 2021

RDFFG WILL BE ADDING A SURCHARGE ON TIPPING FEES FOR:

ASPHALT

CONCRETE

MASONRY AND RUBBLE

ANY MIXED LOAD CONTAINING ANY TYPE OF DLC WASTE
