

DEMOLITION, LAND CLEARING & CONSTRUCTION WASTE

WHAT'S IN YOUR LOAD?

Let's put waste in its proper place & work together to further waste diversion opportunities in the Regional District.

Demolition, Land Clearing & Construction Waste

A **mixed load** of any materials on this card. Source separating these materials before disposal is encouraged!

Asphalt

Petroleum by-product, mixed with gravel or crushed rock, used for paving roads & parking areas.

Asphalt Shingles

Roofing shingles made from petroleum by-product, not including wrap or torch on membrane.

Stumps & Large Branches

Tree stumps free of soil, shrub & tree branches larger than 75mm in diameter.

Clean Wood Waste

Untreated or unpainted wood waste typically from construction or demolition projects. Small amounts of metal (nails & screws) are acceptable.

Painted & Treated Wood

Wood typically from construction or demolition that is painted, treated with preservatives, or contains adhesives or fillers. No tile, gypsum, glue, carpet, dirt or soil or non-wood materials are attached.

Gypsum Board or Wallboard

Construction scraps, painted wallboard and/or covered in wallpaper, vinyl, or ceramic tile, but not containing asbestos. Also known as drywall.

Concrete

Hardened mixture of cement with sand, gravel and/or rebar. Rebar protruding from cement should not be longer than 1ft.

Masonry & Rubble

Loose mass of gravel, bricks, or crushed rock.

Clean Soil

Soil, sediment or fill material without contaminants, refuse or large rocks.

Scrap Metal

Sheet metal, siding, roofing, rebar, flashing, pipes, window frames, doors, furnaces, bathtubs, fencing, bicycles, but not where metal is less than 50% of the product weight & cannot be easily separated from non-metallic components (e.g. a couch).
